Summary

When adding the cement paver to my Ikea Lack enclosure the PSU cord would not reach anymore.

When adding the cement paver to my Ikea Lack enclosure the PSU cord would not reach anymore. I printed a flipped version of the PSU mount and mounted it to the side of the enclosure instead of the back and then cut out a small port hole for the PSU cables to go through. I didn't want the cables to rest against the cut out part of the plexi so I made this for it. The plexi needs to be cut 14mm wide and 18mm tall with a rounded top. I used my Dremmel with a grinder to make the hole.
