I'm sharing my 3D-modeled **minimalistic tool holder** designed for the **Ender S1 Pro**. This is particularly useful for those who've transitioned to Klipper and removed the screen.

Tired of my nippers and tweezers cluttering my work desk, I created this holder, recognizing that these tools are my go-to 95% of the time. Check it out and simplify your workspace!

special thanks to [@ShlimDogMillionaire](#) for the [Ender S1 Pro model](#) that I used as a reference.
