Summary

Bracket to hang paper towel rolls to a shelf

[Household](#) > [Garage](#)

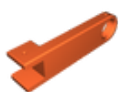

Tags: [shelf](#) [bracket](#) [papertowel](#)

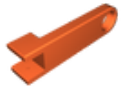

I printed it in PLA+ and it is really sturdy. The pin is to lock the tube when a roll of paper towel is installed. When you need to change roll you remove the pin and slide out the tube.

The tube is made in two pieces so it can be printed with an ender 3 style printer and then glued together.
