If you have O.C.D, Then this is for you! A simple Bayonet Cap bulb holder so you can wall / roof mount them for storage. Simple design, simply insert and twist to lock. Screw hole with countersink in the middle.

2+ Shell, 10% infill, no raft needed. Supports (min 5%) at 60 degree overhang.

The recess on the side was to reduce material. In total, this used about 6g.

NOTE \* If you've got an accurate printer, then print the file. I found the fit a little too snug for my liking. If this is the case with you, print at 101% ratio
