Clippable Hook for IKEA BROR Workbench (303.332.86) plywood top.

The dimensions of the stell frame of the plywood top are different from other BROR shelves, and thus the clip will only fit on the plywood top.

Printed with eSUN PLA+HS. The clip has to be bent slightly when attaching, but is still sturdy enough to hang towels/other not too heavy stuff. For this reason, printing in PETG might be even better (I don't have black PETG at the moment though and the print in PLA works just fine for me).

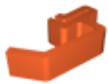

Printed with:

- Nozzle: 0.4mm
- Layer Height: 0.2mm
- Walls: 2
- Infill: 15%

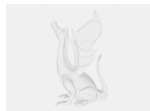

- Bambu X1C
- eSUN PLA+HS
- Cool Plate

Please let me know if you need different dimensions or a parameterized version.
