Hi everybody,  
made my first 3D-Model. A wall mount for a Asus or any other 17" laptop (28cm of space). It has a 50° angle so you can open the screen and also use the keypad. If you scale it to 85%, you can use it for 15"

Tips and potential for improvement are much appreciated :)

Best regards

Robert

Update 09.01.2024: extended the holes, so you can easily mount it to you wall and reduced the thickness of the wall since the first prototype was very strong.
