I'am going to build a storage rack for my RC planes, special for wings

I needed brackets to fix 15mm OSB boards for the rack onto the wodden ground and wodden wall.

Made from PETG.

50% infill density

Pattern: Tri-hexagon

Printed on a Sovol SV06 and a Anycubic Kobra 2 on the same time.

The prints from the Sovol looks a little bit better as from the Kobra.

The Kobra was a bit faster.
