updated 24. 1. 2024 | published 24. 1. 2024

Summary

Modified faceplate to work with the BigTreeTech 4.3 screen.

This is a remix of the faceplate included in the <https://www.printables.com/model/661094-voron-24-trident-with-clicky-clacky-door-touchscre>.

The original faceplate isn't compatible with the BigTreeTech 4.3 screen that came with my LDO kit (Rev C). I modified the hole pattern and added the cutouts on the bottom for the port and button access.

Additionally I made a version that has a Voron logo. It might be slightly tight getting the screen in at the brightness buttons. Best printed with any MMU setup.

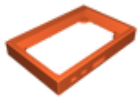

This remix is based on

voron 2.4 / trident with clicky clacky door touchscreen mount

by Smokescreens
