Tags: [holder](#) [mouse](#) [gaming](#) [pc](#) [naga](#) [razer](#)
[mouseholder](#) [razernaga](#)

I designed a holder for my Razer Naga I use mostly for WoW and other MMOs.

I used OrcaSlicer, printed on a ELEGOO Neptune 4 Pro.

My print is a little messy because I changed spool mid-print and didn't test the new filament.

Printing Details:

Material: PLA+

Layer Height: 0.15mm

Infill: 15%
