### Summary

A wasy Wallmount for your bike.

[Household](#) > [Garage](#)

Hi Everyone!

One of my friends ask me to create a Wall Mount for his Bicycles.  
He just want to use a wooden Rod and one Screw per Holder.

I Print the Holder in ABS with 4 Walls and > 30% Infill.

After that you need a Round rod in 40mm.

I use oak for his holders.

The Rod is glued in the Plastic holder and get additionaly secured with 3 Screws.

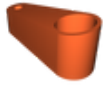

To be sure what the holder is not moving around i Addad a 8mm Metal rod in the back of the wooden Rod, but that is up to you.

The Metal rod is an additional security for the complete holder.

leave a like :)!
