Summary

Bracket to clamp a Brennestuhl power strip to your desk.

[Hobby & Makers](#) > [Mechanical Parts](#)

Bracket to clamp a Brennestuhl power strip to your desk.

Uses a 3d-printed set screw to tighten against the desk.

Use a PH2 bit to carefully screw it in.

Don't overtighten, or it will strip.

I used 4 M6x16 screws + bolts and washers to secure the power strip to the bracket.

If you want to use different sized bolts, I've attached the Fusion 360 file for modification.

You will need to print 2 of "bracket_1_v3.stl" from [this model by Woodchuck](#).

You should print this model with lots of infill, or else it will flex too much. I used 30% Rectilinear, and it felt very sturdy in the end.

This remix is based on

Sturdy and simple power strip mount (perfect for Brennestuhl!)

by Woodchuck
