Summary

Low-profile phone stand for Samsung Z Flip 5

Tags: [phonestand](#) [smartphoneholder](#) [smartphonestand](#) [phoneholder](#)

This is the spiritual successor to my previous phone stand, designed to hold a Samsung Z Flip 5 whether it's open or closed, and without blocking the microphones or speaker. There are three versions:

- V1 comes in 76mm and 78mm widths to handle smaller/larger phone cases.
- V2 removes material from the front/sides, so that it's easier to reach the bottom corners of the phone screen. It also brings a little more finishing to the front of the stand.
- V3 opens up the back of the slot at the bottom, so it's a little easier to pick up the phone without the stand getting stuck to it.

I recommend the V3 version, but have left the other two up for legacy purposes.

If you need an adjustment for your phone/case, let me know and I'd be happy to do it for you.

This remix is based on

Yep, it's another phone stand
