Tags: [handle](#) [bike](#) [handlebars](#) [22mm](#) [22mmhandlebar](#)

This model is for ~22mm handlebar for bike.

The same as those for Cortina U4 bike, but changed the handlebar to pretty standard one so it should fit more models.

Best to print it with TPU/TPE or other elastomer, but PETG should be okay, although i find it a little bit too stiff.

If its not pressfit, then simply glue them to assembly

One is longer and other shorter to accomodate gearbox control
