Summary

This is an adapter to allow you to mount other vacuum tools to the Wyze Cordless Vacuum S using the crevice tool.

This tool was designed specifically to fit the Wyze Cordless Vacuum S, but it should work on any of the similar vacuums with a crevice tool. The adapter has a slot where you can plug the end of the Wyze crevice tool that comes with the vacuum. The other end of the adapter is about 45mm in diameter with a slight taper at the end to allow easy insertion into another tool. The tools that will fit the adapter were from a small sized Rigid Wet/Dry vac. The tool is listed as fitting the 1 7/8 size, but my measurements of the tool make it 45mm.

Easy to print, no supports needed. I printed it in PETG with 20% fill, and it took about 2 hours on a Prusa MK3s+. I may try printing it in a Flex filament, it should work great, but PETG gave a good fit and since the tool socket itself is slightly flexible, it gave a good solid seal. The hole for the crevice tool is snug on purpose so it does not slide around or fall off.
