[cutleryorganizer](#)

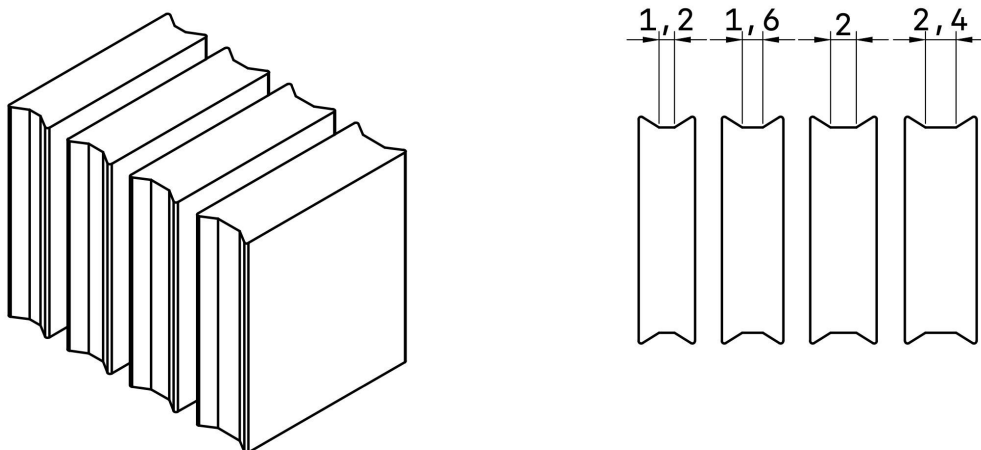

I made this cutlery organizer for spoons, knives, and forks. Thanks to [@HD_218561](#) for inspiration from **Catch-All Trays / Desk organizer**. This organizer also has a compartment for small spoons or forks, with an additional compartment for small things. You can put as many as you want next to each other.

MODEL IS STILL IN DEVELOPMENT - meaning that small mistakes will be solved (please let me know if you find any). The model being in development also means that you are welcome to ask for custom-sized compartments or upgrades!

This model is 60x220x53mm (LxWxH). Either (if you have a large enough print bed) you can print in one piece, or you can use splitted version and combine it after printing. (change in version log)

Modularity is done by small connection pieces, also included in the files. Depending on your printer, you may need differently sized (spaced) connection pieces. For this I made few variations, from 1.2mm up to 2.4mm connection part.

As I mentioned above, I am happy to take any suggestions about new compartments or mistakes done while designing.

Version Log:

v1.1. (13.1.2024) - new base with channel added for even more organized cutlery

v1.2. (13.1.2024) - base with **"It's time to wash the dishes!"** added

v1.3. - (14.1.2024) - base of inner length 245mm added

v1.4. (17.1.2024) - edge base for smaller printers added

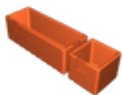

v1.5. (19.1.2024) - temporarily deleted split version for remake
