Discover the charm of our adorable Tardigrade figure, perfect for biology and microbe enthusiasts!

This file includes an STL with a keychain hole and one without for your convenience. Best printed at 0.2 mm layer height, it's still delightful at 0.4 mm layer height, as seen in the pictures. Embrace creativity with multi-color printing, and add a splash of cuteness by coloring the eyes and mouth.

The articulated design adds a fun element, making the figure entertaining when shaken. Download now for a delightful DIY keychain project!

PS: Loves water, plants and ponds, often seen in laboratories!
