## Summary

An insert to help with loading and and unloading a commander deck from side loading deck boxes.

Tags: [mtg](#) [commander](#) [deckbox](#) [edh](#)

An insert to make getting your cards in and out of your deck box easier. Has the added benefit of having your commander face forward for easy identification. Also doubles as a library holder.

I suggest PETG. I've had a few layer separation issues with PLA though this will probably depend on your PLA (mine was cheap no name brand).
