Summary

Update from my first design for hanging the makita charger.

After my first design for the Makita charger holder pins i had the charger coming off the pins. now a new design with locking so it will stay on the wall. i don't know the english name for the screw i used but if you google the dutch name im sure you can find it. "Stokeind" i tested it and it works great. Print it with TPU for the flex part to work.

Happy building ;-)
