As requested by [@corporalbon\\_996018](#), here is a 500% scaled up version of Leonardo, cut up into pieces that easily fit on a Bambu Lab P/X series (and should fit on 220m build plates too).

Note that I had some issues with the dowels not fitting nicely everywhere thus I had to try some different sizes to make it work, you only need 4 dowels total but I've added the different sizes too.
