Summary

A simple thing to help dry the Max 2 toy and it's sleeve by hanging them.

The larger tower, with the supports is for the sleeve and the minor support allows to hang the Max 2 device upside down.

No supports needed.

To use with the max 2 pink sleeve, print 2 of the attachment supports. Flip the supports in the slicer to help in the printing. It'll be easier if they are upside down from what they currently are.

Unfortunately I didn't got the initial measurements right so I created the attachments to circumvent.
