Summary

Card trays that are stackable and modular - measured for unsleeved cards and sized for Tiny Epic games.

I thought little card trays to organize draw and discard piles when playing Tiny Epic games would be useful. I got an idea to make modular trays that were stackable. After that I decided I needed a version that would sit on top without top connectors, or on the bottom without bottom connectors. Also, a freestanding version without connectors.

This led to a different design which I am working on that is not modular. But I thought someone somewhere might get some use out of the time I spent on this.

Contained are trays that are measured to fit cards that are 89mm x 64mm (normal), 70mm x 70mm (square), and 64mm x 41mm (small). By default, all of the pegs are sized for a 0.1 mm tolerance. If your printer isn't dialed in that closely or you want a more comfortable fit I uploaded a 0.2 mm version as well.
