This is the newer and improved version of my [TILT PHONE STAND](#)

The stand allowing you to comfortably and securely hold your mobile phone at the optimal viewing angle.

- It is **not** necessary to glue the parts here. Everything is printed in one piece.
- There is an improved **guide groove** that does not allow slipping.
- The gears fit together better, which allows for more comfortable tilting.
- The adjustable gear contains a groove, which allows the exact position of the gears.
- No gluing is needed here
- Smooth design

When first installed, it is possible that the gear will be tight in the base. It is necessary to turn the adjustable gear a few times so that the gear has a smooth movement.
