Summary

Makes it so the replacement LED fixture doesn't fall through the hole, and provides a smoother, more finished look

[Household](#) > [Other House Equipment](#)

When replacing my old can lights with these HALO-brand 6-inch LED replacement light fixtures, I found that the holes were just a tad too big and the clip-in “pucks” would pull all the way through the hole, so I designed this ring adapter. Also there was a noticeable smudge ring left by the old can light fixture that I need to hide.
