An easy-to-print and easy-to-assemble headphone design consisting of two parts.

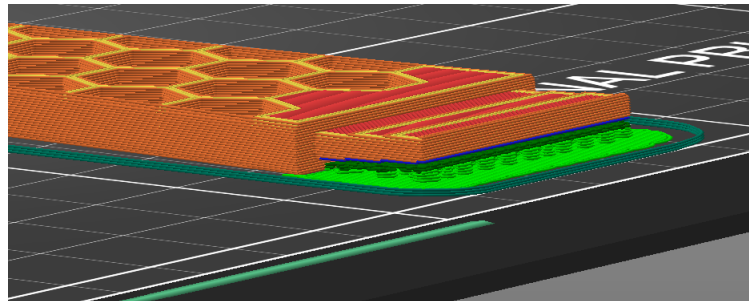

The parts can be assembled with a tongue and groove-type joint.

I chose to paint the lower part with metallic silver paint, but it is up to you which color you choose for print or painting.

The lower part needs some support at the bottom of the skull:

The upper part needs support under the tongue part (if you are using a similar printing orientation as me):

For larger headphones, you may consider scaling the models to 110 % or 120 %.

In the cover image, 110% scale was used!!!

Show me your makes in the comments!
