updated 1. 4. 2024 | published 1. 4. 2024

Summary

Meet Rosco the Rooster, I modeled and sculpted him on the Nomad app

[World & Scans](#) > [Animals](#)

Tags: [animal](#) [sculpt](#) [animals](#) [chicken](#) [birds](#) [chickens](#)
[poultry](#)

Supports required!

Edit: I recommend using Tree supports, and utilizing a support blocker between the two toes. This will help make supports not cross between the feet! (see image of support blocker between feet if you need some help.)

If your still having issues add a modifier, and change the % infill for only the legs!

Model files

rosco-the-rooster.stl

☐ Finalized version, more detail

rosco-rooster-draft.stl

☐ Rough draft version (the one I printed out)

rosco-the-rooster-xl_feet.stl

☐ Additional version, with extra large feet to help aid support removal without breaking!
