Summary

A 1x2 Raspberry Pi Holder in a case)

[Gadgets](#) > [Computers](#)

Tags: [raspberrypi](#) [sdcardholder](#) [microsdcardholder](#) [gridfinity](#)

This is a Gridfinity holder for a raspberry pi, inside of a case. If you would like to use the exact case I modeled this, use [this case](#). I also will be making a double version of this in 2x2, in case someone has a couple pis lying around. You could place your pi into the slot without a case, but it will be loose. There are three variations, two with SD/Micro SD slots, and one without.
