Introduction:

If you decide to learn to locksmith, (and I suggest you don't), you will likely encounter many small microscopic parts that attempt to dissappear into the ether right before your very eyes. They are there one minute, and then they are gone. Unbeliveable.

Blunt their ability to disappear with a simple organizer tray to keep track of all the small parts. When the fun is all done, simply slide it into the drawer.

Design Features:

- Six bins for small parts (Top of tray)
- Integrated Pinning Tray with Core Holder and Lock Holder (Center of Tray)

- Tool Holders (Top Right of Tray)
- Tool Tray (Right of Tray)
- Work Tray (Bottom of Tray)
- Large Chamfer on trays helps with parts retrieval

If you feel so inclined, you can buy me a coffee:
