Update 02.04.2024:

Based on the existing feedback, the bottom was increased by 100% and the walls by 50% to make the tray more stable. In addition, the cut-out in the "bed alignment"-version has been designed to fit even more precisely. Minor adjustments have also been made.

A shorter version is now also available, which saves printing time and material (~34% less).

Update 19.02.2024:

A Trash Tray / Pooptray for the right side is now available! See photos.

Update 30.01.2024:

Modified version provided if you are using the [bed alignment guide](#). See last photos.

Summary

Based on the [model](#) I have made the necessary adjustments for an Elegoo Neptune 4 Plus.

Fits perfectly on the screws and does not slip.

Compatibility

Fits the Elegoo Neptune 3 Plus and Neptune 4 Plus.

Print

No supports are needed!

I recommend printing in PETG due to the close proximity to the heating bed, but PLA should also be fine.

Due to the low complexity of the model, a print with a layer height of 0.3 mm is also fine.

Do you like my work? I would be very happy if you would support my work [on Ko-fi](#).
