Tags: [volcano](#) [voron](#) [nfcrazyhotend](#) [nfcrazy](#) [dragonburner](#)

This is a modification to the nice DragonBurner v8 toolhead to accomodate the NF Crazy Volcano Hot End. Just the affected parts were posted, and you should download another parts from the original source.

You will loose 2mm on Z travel compared with the original one.

Print in ABS with the standard Voron configurations. This is the version for zeroclick probe.

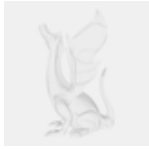

This is part of my Trizero (a Voron V0 mod) project. More mods and info can be found at:
