I've got an impressive collection of spices, over 50 varieties to be precise! Convincing my wife about the practicality of 3D printers for everyday use wasn't a walk in the park, but this project sealed the deal. It's a breeze to print—Quick and hassle-free. No need for supports. Just add a stop for color changes.

To make it even better, I've attached the Fusion file for you. Just dive into the "Tekst" sketch, and you can personalize your own signs. Enjoy your spice organization journey!
