### Summary

You don't need to screw it in and it's much better to read.

I don't like the screw-in version of my Triumph, so I made a stick-in one.

And in white it's much better to see the oil on it.

The length of the original depends a bit because of the o-ring, but I'm sure the printed one is well within +/-0,5mm.

Printed in PETG with supports. Make sure to enable 'detect thin walls' to get the grid.
