A simple tray/drawer to place under the printer, the maintenance tools that come with purchasing the Creality K1.

The total size is 200x200x13mm and it fits perfectly at the bottom of the printer (see photographs).

The only thing that could not be placed was the glue stick because it does not fit underneath, with or without the tray.

The photographs show the first version, but the one uploaded is v2 where another separator has been added to the right and the Creality logo has been removed for copyright reasons.

For testing it was printed using Creality Hyper PLA in normal quality with a layer height of 0.2mm and 300 mm/s speed. With these parameters it should print correctly.
