Summary

X-Tensioner cover the the Anycubic Kobra Neo. It is a tighter fit than the original, but still works.

Tags: [tensioner](#) [anycubic](#) [replacementpart](#) [replacementparts](#)
[anycubickobra](#)

Replacement for the OEM X-axis tensioner.

Layer Height - 0.2 or 0.3

Infill - 10-20%

No supports needed when printed standing up

Set screws before trying to mount or it'll be more difficult than it needs to be.

I also included a version that does not have the “wings” that the original model has.
