The Voronoi Baby Elephant is an artistic rendition of a playful elephant calf with a body characterized by the voronoi pattern, which creates a mesh-like appearance. This design choice not only looks visually appealing but also saves material and reduces print time, making it a cost-effective model.

**Recommended Colors:** While this model is displayed in black, feel free to personalize your elephant with colors that suit your taste or décor. For a natural look, shades of grey or brown might be preferred, but there's no limit to your creativity—pastels can give a soft, nursery-appropriate feel, while bright colors can turn it into a funky, eye-catching piece.
