Summary

Split the original model and added a channel in the outer piece of the hinge so they can be slotted together.

[Gadgets](#) > [Portable Devices](#)

Tags: [joystick](#) [steamdeck](#)

Steam Deck Joystick guards.

I could not get the original model to print, the two halves would seal together and break when trying to loosen the hinge. So I separated the models and added a channel so they can be slotted together after printing.

I was able to fit 6x2mm magnets in them with a little cleaning with a knife. Increase print size 1-2% may make it easier, or require glue.

The Right half needs supports for the hinge piece.

Additional supports are recommended.
