Tags: [dyson](#) [dysonvacuum](#) [dysonadapter](#) [dysonv8](#) [dysonv7](#)

Very simple accessory bracket for Dyson vacuum accessories, sized for a large 3M command strip. Fits more-snugly against the wall than other similar models, this bracket is intended for use with non-powered accessories, specifically the crevice tool and brush tools.

Printed in basic PLA on a Bambu Lab P1S. 0.4mm nozzle, 3 wall loops, 3 top/bottom layers, 15% cubic infill, no supports, otherwise standard profile.

Only orients accessories 1 way (accessories cannot rotate or be clipped in from the top), but is single piece and prints quickly. STEP file included for remixes or adjustments.
