Summary

Broke the sharp edges, added some grip

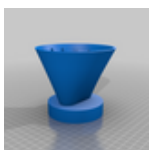

[Hobby & Makers](#) > [Other Ideas](#)

This is a minor refinement of Frank Keene's great model. I just wanted it to feel a little better in my hand. I included a 3MF file if anyone wants to edit further.

My photos are a fast 4-hour print with transparent PLA - using only 2 external perimeters, 2 top and bottom perimeters, and 5% infill (grid).

I painted/enforced supports on the underside of the grid in the center. The other parts of the lid bridged just fine. A better printer might be able to bridge the whole thing without supports.

This remix is based on

Mason Jar Filter Funnel
