Update 2024 01 17: Added a larger twin version with 110mm diameter for paper towels.

---

Note: The model is quite large, so i've added a medium sized one for printers under 200x200 buildplate.

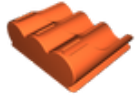

This was designed to organize my trash bag rolls, but it can probably be used in many different ways as well

It can be installed standing or sideways like shown in the picture.

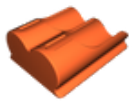

Details:

Diameter of the tube is 85mm in default size. Screw hole in default size is for ~3mm diameter screws.
