Tags: [drybox](#) [hygrometer](#) [hygrometermount](#) [thermopro](#)
[thermoprotp50](#) [tp50](#)

A little holder I made to loosely hold onto a thermopro tp50 for my drybox. I made it such that there was space to use command velcro strips to make it detachable from the lid of my container, as the walls are not transparent.

Best printed with flanges down onto the print bed.

Printed on Creality K1 Max with following settings:

- 0.4mm nozzle
- 0.2mm layer height
- Overture PLA White
- Auto Brim
- 15% grid infill
