updated 15. 1. 2024 | published 15. 1. 2024

Summary

Holder for the 2 attachments that come with the Jura S8. This holds the attachment not being currently used.

This is my very first design that I have actually been able to use. I was needing a way to store the extra attachment for my Jura S8 without having to throw it in the cupboard where I was afraid it was going to get lost. This attaches directly to the side of the machine with a simple 3M Command Strip.
