## Summary

A cup and punch to make an indent in your ski boots for more ankle room. Made to fit the track of a clamp.

[Sports & Outdoor](#) > [Winter Sports](#)

Made originally for my dad, but decided to post it here for everyone to use. If you are wondering why the cup is bigger than the punch, its so while both are in place it can form to the shape of the boot for a better fit. PRINT WITH 70% - 100% INFILL. PLA works but PETG will work better though for higher heat.
