This Print is solves the Problem ov Stacking Thommy Tubes in a Drawer. While some of them do stand pretty well on a shelf, everytime the drawer is closed, they fall over. This relatively simple print helps the tubes keep standing when the drawer is moved.

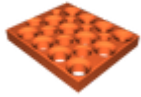

The .f3d File is added, so this can be remixed easily to hopefully anyones needs.

I did Print it with 0.3mm Layerhight and 10% infill in PLA, which did work great for me.
