Add a nice quick detail to your Axial CJ-7 with hinge and vent covers. There's two sets of files included.

The “easy” one, has the bolts printed and you'll just need to use double-sided tape to apply them; you don't even need to take the decals off if you don't want to.

The “hard” one, includes 14 holes to be filled with scale M2 screws (see [Vanquish Products 2x8mm Scale Hardware \(Black\)](#)), backers are included since the screws can be pretty long.

Want these hinge & vent covers, don't have a 3D Printer? Checkout my [Etsy Store](#)!
