updated 20. 1. 2024 | published 20. 1. 2024

### Summary

Bowls w/ Press in Magnets allowing you to secure the bowl to a magnetized plate as well as magnetize the bowl contents.

I have remixed the 1x1, 1x2, and 1x4 Bowl design by ethanthompson to contain magnets for snapping the bowl into a magnetized plate as well as magnets positioned proportionately to magnetize the bowl and its contents. This can be helpful for allowing objects such as screws to stay within the bowl.

All of the holes are designed for **6x2mm magnets** that can be **pressed in**, no glue is needed.

I am currently working on magnetized versions of all other models and will release them once complete.

If you see any changes that could be useful, please leave a comment below and I can make adjustments.

Updated 1/17/24 Added 1x2 and 1x4 variants.
