updated 28. 7. 2021 | published 28. 7. 2021

### Summary

Mount for your caliper! I am using some double sided tape to hold it, but i added a version with holes just in case.

Mount for your caliper! I am using some double sided tape to hold it, but i added a version with holes in case.

I made it for my iGaging OriginCal. HOWEVER, i believe it should fit any caliper out there!

Supports only needed on one small portion. Short and relatively simple print.

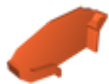

Supports:

If you are using my 3mf file, ensure you have supports set for support enforcers ON. This will use the support modifier i placed in the 3mf file. Also I would recommend a Brim just to adhere the small area of the first layer.

There is a normal version an a “Hesed” version. The Hesed version has the word Hesed on it. For more information on what Hesed means, please go to my page and read the bio.

P.S: If you listen to the video closely you can hear us watching Tangled haha.

## Model files

**caliperholder.stl**

**caliperholderhesed.stl**

☐ Has Hesed Logo on it. For more information on what Hesed means, please go to my page bio.

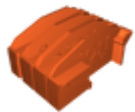

**caliperholder\_holed.stl**

☐ Added holes if you want to mount it with screws. The back is thicker to accommodate the screws

**caliperholderhesed\_holed.stl**

☐ Added holes if you want to mount it with screws. The back is thicker to accommodate the screws

**caliperholders.3mf**

☐ Any of the Holders (Supports already added)
