Introducing the ultimate accessory for Marvel aficionados: the 3D-printed Iron Man hand! Crafted with the precision of Tony Stark's engineering genius (well, almost)

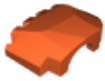

Crafted from the finest filaments this side of Asgard, this Iron Man hand is the epitome of 3D-printing prowess. It's not just a prop; it's a statement. Whether you're an Iron Man enthusiast, a tech geek, or just someone with a penchant for turning heads, this hand is the ultimate conversation starter.

I made my hand using 30% density and using the supports available in Ultimaker Cura. Besides using it to decore your room, you can also put a lamp inside it to bring it more to live.

This is my first version of this hand and it was made in **openScad**, I may upgrade it in the future (such as naming the screws, better ways to assemble it, better joints ,etc).

Catch you on the flip side!

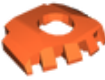

## Model files
