Summary

The holes on my ZT Fab cart were a tiny bit small for my disposable gas bottles.

Tags: [welding](#)

I created this bottle holder to allow my disposable gas cylinders to sit securely on my welding cart. The stock hole was just a tiny bit too small and an odd ellipse.

I tried to get the fit just right but then ended up making it a bit looser. A generous amount of hot glue holds it in nicely.

*.F3D file is available if you want to modify it

Printed .3 Layers 3 walls %10 infill.

Happy welding!
