#### ===UPDATE February 2, 2024

Added **Desk / Tabletop Base for HSW Display Arm** so you can now have it on your desk or tabletop.

Also verified that this seems to work just fine with PLA

Print Profile is available: [HERE](#)

Also pictured: **Batman (Dummy 13 variant)** & **Screw Top Container** to hold your extra parts

### ===ORIGINAL POST

Here's a way to display and pose your Dummy 13 on your HSW. I remixed the insert, adapter, and joints to make a flexible way show off your figures.

You can print as many connector pieces as you need, I used 6.

**ONLY printed and tested with PETG as PLA usually cracks when you snap the pieces together.**
