New size! KURETAKE GANSAI TAMBI PANS for your Watercolour Palettes!

Do you love using big giant fluffy brushes? Do you need more space to mix up a rich, saturated wash? Try out some big Kuretake pans!

The horizontal layer lines which are a result of 3D printing are actually a feature in this case! Your dried paints are less likely to fall out!

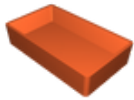

I have included the Cura Profile I use for printing these pans on my Ender 3. You'll also find .stl and .3mf files with 12 pans to make printing bigger quantities easier.

Please post a make if you use these! I'd love to see your newly filled palettes!!

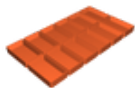

Check out my Etsy shop for more art tools, both physical items & digital STLs! <https://spruceandsquirrel.etsy.com/>
