### Summary

Standard-sized HALF and WHOLE PANS! The walls are thin, so there's less material usage AND you have more room for PAINT!

Standard-sized HALF PANS and WHOLE PANS for your Watercolour Palettes!

The walls are thin, so there's less material usage AND you have more room for PAINT! In the photos, you can compare with the pans from Schmincke & White Nights. A whole pan from Schmincke holds 3.0mL and the whole pans I designed hold 4.0mL!

The horizontal layer lines which are a result of 3D printing are actually a feature in this case! Your dried paints are less likely to fall out!

I have included the Cura Profile I use for printing these pans on my Ender 3. You'll also find STL and .3mf files with 12 pans to make printing bigger quantities easier.

Please post a make if you use these! I'd love to see your newly filled palettes!!

Check out my Etsy shop for more art tools, both physical items & digital STLs! <https://spruceandsquirrel.etsy.com/>
